QUIETDOWN
ACOUSTIC UNDERLAY

Features & Benefits

Features & Benefits:

- High Performance mid to high frequency impact sound reduction Acoustic Underlay achieving a FIIC 61* under wood floor systems.
 - Doubles as a crack isolation membrane under ceramic and stone installations.
 - Unlike foams and other rubber underlays, QD High Bond offers superior bonding and anchoring of adhesives and mortars in glue down wood and stone/tile assemblies.
 - QD is an extremely durable 100% vapour barrier, is mildew and insect repellent and will not rot or fall apart over time.
 - QD has low surface deflection and will not sag or compress like foams and felt fibre underlays.
 - QD meets ASTM C627-93 Robinson Test designation for medium to heavy commercial applications in tile and stone assemblies.
 - QD's high coefficient of friction reduces creeping and movement of floating wood systems.
 - QD's natural physical properties offer excellent thermal R values and reduce passive thermal loss.
 - QD is a green product, is engineered and manufactured from recycled tires thereby diverting waste from our landfills.
 - QD products contribute to LEED credits.
 - Easy to handle sheets versus rolls make for less waste and lay down flat with no curled edges.
 - QD sounds good, providing a nice solid feel to the floor.
 - QD is available in the following thicknesses: 1/12", 1/8", 1/4", 3/8" x 42"W x 48"L.
- * Based on 8" concrete slab and 1/8" QuietDown with no suspended ceiling.
